

CTB QUOTE[™] plus

CTB Quote Plus Release v1.6.1 – 1.6.5

Release Notes – April 27, 2018

Background:

Milgard regularly publishes updates to the quote tool, CTB Quote Plus, to improve the quoting experience and squash annoying bugs. CTB Quote Plus operates most often on a biweekly release cycle every other Thursday, but on occasion will publish weekly releases or off cycle release to resolve high priority items.

Updating CTB Quote Plus:

CTB Quote Plus is a cloud-based software with automatic updates – customers do not need to download and/or apply any updates. After a typical release the next time a customer logs in, they will experience the most up to date CTB Quote Plus experience.

Updating Quotes in CTB Quote Plus:

CTB Quote Plus does not require a user to update a quote, however it is a best practice before quote submission to Milgard for processing. To update a quote to the latest and greatest, a user just needs to press one button: **Validate All**. Pressing Validate All will rerun all lines on your quote with the latest rules and ensure your quote is fully up to date.
